Advanced Structural Fat and Filler Injection "SAFI"

"SAFI"

Date. October 17<sup>th</sup> ~ 18<sup>th</sup> (Thu. - Fri.), 2019

Venue. Seoul Clinic, Busan, Korea

**Korean College of Cosmetic Surgery & Medicine**

## **Advanced Structural Fat and Filler Injection “SAFI”**

**Greetings dear colleagues!**

This program will enable participants to not only understand the anatomy and aging process of the face, but also to experience an advanced fat grafting technique, SAFI.

Facial fat grafting procedures have been actively performed according to Dr. Coleman's structural fat grafting method. Since then, various methods such as Rebalancing Lipo-plasty Technique, FAMI, Complementary Fat Grafting, CAL and Nano Fat have followed suit in facial fat grafting procedures. The main purpose of these methods is only to restore the lost volume with a high survival rate, and eventually return the patient's face to its youthful state.

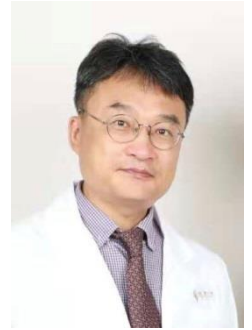

The SAFI technique is also known as one of the advanced techniques, however, unlike these it is performed by not only correcting the deficient volume of the soft tissue, but improving the facial bone deformity. Therefore, after attending this workshop, participants will have the ability to apply the SAFI technique to achieve natural soft tissue contouring with a high survival rate through the correction of facial bone deformities.

For a more perfect facial rejuvenation, the complementary combination treatment of facial liposuction, thread lifting, man-made filler, Botox, and allograft implantation will be discussed, performed and taught in this workshop. In addition, ADSC, PRP and Nano Fat will all be introduced as methods to increase survival rate as well.

Particularly, in this workshop, SAFI (Sequential Augmentation of Filler Injection) technique will be introduced using hyaluronic acid man-made filler. It will be applied for not only volume augmentation but also the functional improvement of eye, nose, mouth, and chin.

After attending this workshop, participants will have the ability to apply the SAFI technique to achieve natural soft tissue contouring through the correction of both facial soft tissue and bone deformities and to improve the function of eye, nose and mouth.

I sincerely welcome you to join us at the Advanced Structural Fat Grafting Workshop. Hope to see you there!
