## Hair Transplantation Workshop For 4 doctors

**Moraenae Clinic, Jeonju, Korea**

**September 27 – 29, 2019**

## 2019 KCCS Hair Transplantation Workshop

Hello!

I am very pleased to demonstrate a live hair transplantation workshop in Jeonju, which has the most traditional culture and delicious food in Korea. The Hanok Village in Jeonju is so famous it has been profiled on CNN. You can't find any other place in Korea where there is a low skyline and the Korean traditional houses have been so beautifully preserved.

Hair transplantation is the fastest semi-permanent procedure for patients with hair loss. Hair transplantation was initially performed in the interests of doctors, but nowadays it is performed in the interests of patients. We are trying to minimize the discomfort of post procedure pain and scarring, so our patients can return to their normal daily lives quickly, and also minimize their fear of surgery. As a result, hair transplantation has been changing from an invasive method to a non-invasive method such as FUE.

Traditional FUT requires a lot of staff and proficiency, which was not easily accessible to the novice hair transplantation doctors. However, FUE can be easily accessed by doctors in that it can be performed up to a point by doctors with proficiency. The FUE procedure is labor intensive, so the long period of time required may cause the doctor to become fatigued, resulting in poor accuracy. Robot hair transplantation is being used for the procedure to alleviate the discomfort of these doctors. In this Live Workshop, we prepared FUT to Rootic HT. We also will demonstrate the recent trend of eyebrow hair-transplantation.

I hope this Live Surgery Workshop will be helpful and informative for the participants. Also, I hope that this live workshop will give you a chance to go back to your hospital or clinic and perform the procedure right away.

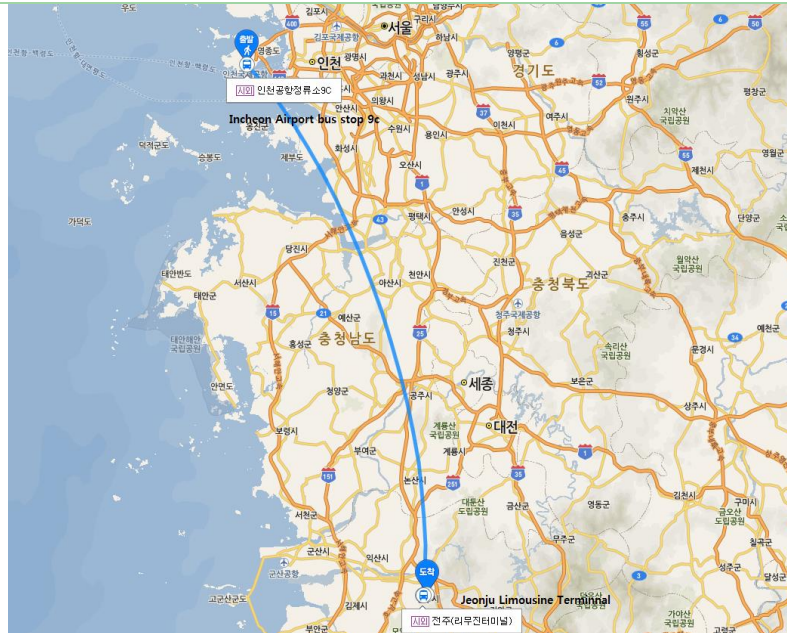

Thank you.
